Multibanco is a push-based, single-use and synchronous method of payment. This means your customer takes action to send the amount to you through a receiver. The pushing of funds may take as little as a few minutes or at most seven days, since your customer must do this outside of your checkout flow.

Multibanco payments with Sources Beta - Stripe

stripe : docs : sources : multibanco

What is the Multibanco payment process?

- 1 Choose Multibanco at checkout. The customer selects Multibanco on the payment page.
- 2 Payment authorization. The customer pays immediately via their online banking app or chooses to receive a code to pay at any Multibanco cash machine within seven days.
- 3 Transaction completed.
