If you're trying to install an Xbox game from a disc and the installation process stops at 100%, or near 0%, this could be caused by the console trying to download an update for the game while the game is still installing. To fix this, you can try the following steps:

1. Make sure the disc is clean and free of scratches.
2. Check the disc's region code and make sure it matches the console's region.
3. Try installing the game on a different disc.
4. Try installing the game on a different console.
5. Try installing the game on a different Xbox Live account.
6. Try installing the game on a different Xbox Live region.
7. Try installing the game on a different Xbox Live country.
8. Try installing the game on a different Xbox Live language.
9. Try installing the game on a different Xbox Live network.
10. Try installing the game on a different Xbox Live connection.
