<p></p><p></p><p>The TL;DR version of this review is: surprising ligh
t, extremely pocketable, does the job, not my dream charger but at the price it
s well worth it.</p>
<p>We ve covered a product of Lepow s before, the Moonstone. Like the Moon
stone, the Poki comes with a cloth carrying case that you can stash a USB cable
in (it appears to come with a 6 ± USB-> MicroUSB,) or chuck your ID and credit
card in and use it as a wallet while you re out. It s actually the first thing
that stood out when I was looking at the device. The Moonstone is still going st
rong with a friend of mine a year later.</p>
<p>The battery delivers a 90% conversion efficiency rating according to sp
ecs on the manufacturer s website. Most batteries go from the high 70 s to mid 8
0 s. You want to see a higher number as this is how much power gets delivered wi
th the rest being lost in conversion.</p>
<p>The Poki can charge and recharge at 2.1amps. This means you re not stuc
k for 20+ hours charging a 10,000mAh battery at 500mA. At 2.1 amp you should be
able to charge this in under five hours and with 90% conversion efficiency you s
hould have around 9000mAh of actual juice to spare. That should be enough for at
least three complete charges from dead to full for any smartphone on the market
today.</p>
<p>2.1 amp charging also means you re not going to spend ~7 hours charging
a 3000mA phone from dead, more like an hour and a half if your phone supports i
t.charging that fast.</p>
<p></p><p></p><p>pedida! Mas, antes de escolher, é importante p
ensar como voc#234; pretende usar, t#225;?</p>
<p>- É</p>
<p>que, dependendo de objetivo, o modelo ideal de t#234;nis pode mudar</p>
