Is there any way to predict what number it

will choose? The Google random number generator is designed to prod

uce numbers that are statistically random, meaning they should not

follow any discernible pattern or be predictable. It uses algorithms and various

sources of entropy to generate randomness.

Random number generators are

typically software, pseudo random number generators. Their outputs are not trul

y random numbers. Instead they rely on algorithms to mimic the selec

tion of a value to approximate true randomness.
