One of the most well-known benefits of con

suming hops is their potential to promote relaxation and improve sle

ep quality. Hops contain a compound called xanthohumol, which has b

een found to have a mild sedative effect on the body.

People

who have conditions that are sensitive to estrogen

should use cauti

on when taking hops. Some of these conditions include breast cancer and endometr

ia and other medications during and after surgical procedures.

Surgery: Hops might cause too much sleepiness when combined with anesthes

ia and other medications during and after surgical procedures.
