

This unsettled magnetic field behavior also known as solar activity can trigger solar flare eruptions from the surface that release vast amounts of electromagnetic radiation a form of energy that includes radio waves, microwaves, X-rays, gamma rays and visible light.

Solar flares: What are they and how do they affect Earth? | Space ; solar-flares-effects-classification-formation ;

Solar flares are large eruptions of energy coming off the Sun containing several different forms of energy: heat, magnetic energy, and ionizing radiation. The ionizing radiation released during solar flares includes x-rays and gamma rays.
