Each Minesweeper game starts out with a grid of unmarked Squares. After clicking one of these squares, some of the squares will disappear, and some will remain blank; and some will have numbers on them. It's your job to use the numbers for figuring out which squares are safe to click and which are mines. And why are they safe that way? Well, the numbers tell you how many mines are adjacent to that square. So if a square has a 2, that means there are 2 mines adjacent to it. If a square has a 0, that means there are no mines adjacent to it. If a square has a 1, that means there is 1 mine adjacent to it. If a square has a 4, that means there are 4 mines adjacent to it. If a square has a 8, that means there are 8 mines adjacent to it. If a square has a 9, that means there are 9 mines adjacent to it. If a square has a 10, that means there are 10 mines adjacent to it. If a square has a 11, that means there are 11 mines adjacent to it. If a square has a 12, that means there are 12 mines adjacent to it. If a square has a 13, that means there are 13 mines adjacent to it. If a square has a 14, that means there are 14 mines adjacent to it. If a square has a 15, that means there are 15 mines adjacent to it. If a square has a 16, that means there are 16 mines adjacent to it. If a square has a 17, that means there are 17 mines adjacent to it. If a square has a 18, that means there are 18 mines adjacent to it. If a square has a 19, that means there are 19 mines adjacent to it. If a square has a 20, that means there are 20 mines adjacent to it. If a square has a 21, that means there are 21 mines adjacent to it. If a square has a 22, that means there are 22 mines adjacent to it. If a square has a 23, that means there are 23 mines adjacent to it. If a square has a 24, that means there are 24 mines adjacent to it. If a square has a 25, that means there are 25 mines adjacent to it. If a square has a 26, that means there are 26 mines adjacent to it. If a square has a 27, that means there are 27 mines adjacent to it. If a square has a 28, that means there are 28 mines adjacent to it. If a square has a 29, that means there are 29 mines adjacent to it. If a square has a 30, that means there are 30 mines adjacent to it. If a square has a 31, that means there are 31 mines adjacent to it. If a square has a 32, that means there are 32 mines adjacent to it. If a square has a 33, that means there are 33 mines adjacent to it. If a square has a 34, that means there are 34 mines adjacent to it. If a square has a 35, that means there are 35 mines adjacent to it. If a square has a 36, that means there are 36 mines adjacent to it. If a square has a 37, that means there are 37 mines adjacent to it. If a square has a 38, that means there are 38 mines adjacent to it. If a square has a 39, that means there are 39 mines adjacent to it. If a square has a 40, that means there are 40 mines adjacent to it. If a square has a 41, that means there are 41 mines adjacent to it. If a square has a 42, that means there are 42 mines adjacent to it. If a square has a 43, that means there are 43 mines adjacent to it. If a square has a 44, that means there are 44 mines adjacent to it. If a square has a 45, that means there are 45 mines adjacent to it. If a square has a 46, that means there are 46 mines adjacent to it. If a square has a 47, that means there are 47 mines adjacent to it. If a square has a 48, that means there are 48 mines adjacent to it. If a square has a 49, that means there are 49 mines adjacent to it. If a square has a 50, that means there are 50 mines adjacent to it. If a square has a 51, that means there are 51 mines adjacent to it. If a square has a 52, that means there are 52 mines adjacent to it. If a square has a 53, that means there are 53 mines adjacent to it. If a square has a 54, that means there are 54 mines adjacent to it. If a square has a 55, that means there are 55 mines adjacent to it. If a square has a 56, that means there are 56 mines adjacent to it. If a square has a 57, that means there are 57 mines adjacent to it. If a square has a 58, that means there are 58 mines adjacent to it. If a square has a 59, that means there are 59 mines adjacent to it. If a square has a 60, that means there are 60 mines adjacent to it. If a square has a 61, that means there are 61 mines adjacent to it. If a square has a 62, that means there are 62 mines adjacent to it. If a square has a 63, that means there are 63 mines adjacent to it. If a square has a 64, that means there are 64 mines adjacent to it. If a square has a 65, that means there are 65 mines adjacent to it. If a square has a 66, that means there are 66 mines adjacent to it. If a square has a 67, that means there are 67 mines adjacent to it. If a square has a 68, that means there are 68 mines adjacent to it. If a square has a 69, that means there are 69 mines adjacent to it. If a square has a 70, that means there are 70 mines adjacent to it. If a square has a 71, that means there are 71 mines adjacent to it. If a square has a 72, that means there are 72 mines adjacent to it. If a square has a 73, that means there are 73 mines adjacent to it. If a square has a 74, that means there are 74 mines adjacent to it. If a square has a 75, that means there are 75 mines adjacent to it. If a square has a 76, that means there are 76 mines adjacent to it. If a square has a 77, that means there are 77 mines adjacent to it. If a square has a 78, that means there are 78 mines adjacent to it. If a square has a 79, that means there are 79 mines adjacent to it. If a square has a 80, that means there are 80 mines adjacent to it. If a square has a 81, that means there are 81 mines adjacent to it. If a square has a 82, that means there are 82 mines adjacent to it. If a square has a 83, that means there are 83 mines adjacent to it. If a square has a 84, that means there are 84 mines adjacent to it. If a square has a 85, that means there are 85 mines adjacent to it. If a square has a 86, that means there are 86 mines adjacent to it. If a square has a 87, that means there are 87 mines adjacent to it. If a square has a 88, that means there are 88 mines adjacent to it. If a square has a 89, that means there are 89 mines adjacent to it. If a square has a 90, that means there are 90 mines adjacent to it. If a square has a 91, that means there are 91 mines adjacent to it. If a square has a 92, that means there are 92 mines adjacent to it. If a square has a 93, that means there are 93 mines adjacent to it. If a square has a 94, that means there are 94 mines adjacent to it. If a square has a 95, that means there are 95 mines adjacent to it. If a square has a 96, that means there are 96 mines adjacent to it. If a square has a 97, that means there are 97 mines adjacent to it. If a square has a 98, that means there are 98 mines adjacent to it. If a square has a 99, that means there are 99 mines adjacent to it. If a square has a 100, that means there are 100 mines adjacent to it.
