Each Minesweeper game starts out with a grid of unmarked Squares. After clicking one, some of these Squares will disappear, because some will remain blank; and some already have numbers on them! Your job is to use the Numbers for clues to figure out which squares are safe that they are not. The numbers represent the number of mines adjacent to that square. The numbers 0-8 are used to represent the number of mines. 0 means no mines are adjacent to that square. 1 means one mine is adjacent to that square. 2 means two mines are adjacent to that square. 3 means three mines are adjacent to that square. 4 means four mines are adjacent to that square. 5 means five mines are adjacent to that square. 6 means six mines are adjacent to that square. 7 means seven mines are adjacent to that square. 8 means eight mines are adjacent to that square.
