Make no mistake when the bubble period is reached in

a tournament, things change. It really is the do-or-die time. It is

fairly common to find players changing their style dependent upon the stack in front of them.

This affects whether they decide to look at survival which will ensure they get a share of the prize on offer, or whether they should play with the intention of busting out other players.

Survival: This category of player has their priority on surviving. By doing so they will be safe in the knowledge that doing so entitles them to take home some winnings.

Don't just assess your bad moves, look closely at the good ones. By combining this knowledge and putting it into action in future tournaments the buzz of the bubble will be yours in a very positive way!
