<p></p><p>To fully exploit the constrained width, avoid loadin g the neighbouring structures and straddle shared utilities running under the si te, the 💳 house was constructed using a lightweight steel frame on a pi led slab. The steelwork was prefabricated as a series of 💳 portal frame s that were craned down the alley and site-welded together. Given that every inc h in such a narrow space 💳 was valuable we chose to fully weld the conn ections and express the frame internally, even utilising the depth of the ԁ 79; steels to maximise the space.</p>

By repla cing a narrow disused alley with this comfortable small home we hope to have enh anced the streetscape we 💳 inhabit. As the building completes the terra ce, so does the front garden - with the simple bin store, planting, level ԁ 79; access and bike parking we aimed to keep it open and reinforce the pavement line without making a hard boundary. 💳 The development highlights the
