At roulette, the odds are constant, and

past outcomes have no effect on future play.

On a double-zero wheel,

the chances of any given number showing up are 1 in 38, every time, no matter

what has gone before.

THE PHYSICS

OF ROULETTE. Our understanding of the physics behind the movement of the ball

and wheel is pretty solid governed by Newton's laws of motion

. As the ball slows, gravity takes hold and it falls into one of the

numbered compartments. It is predictable when the ball will leave the rim.
