&lt;p&gt;&lt;/p&gt;&lt;p&gt;The TL;DR version of this review is: surprising ligh  
t, extremely pocketable, does the job, not my dream charger but at &#128177; th  
e price it s well worth it.&lt;/p&gt;  
&lt;p&gt;We ve covered a product of Lepow s before, the Moonstone. Like the Moon  
stone, the Poki comes &#128177; with a cloth carrying case that you can stash a  
USB cable in (it appears to come with a 6 † &#128177; USB-&gt; MicroUSB,) or ch  
uck your ID and credit card in and use it as a wallet while you re out. It s &#1  
28177; actually the first thing that stood out when I was looking at the device  
. The Moonstone is still going strong &#128177; with a friend of mine a year la  
ter.&lt;/p&gt;  
&lt;p&gt;The battery delivers a 90% conversion efficiency rating according to sp  
ecs on the &#128177; manufacturer s website. Most batteries go from the high 70  
s to mid 80 s. You want to see a higher number as &#128177; this is how much p  
ower gets delivered with the rest being lost in conversion.&lt;/p&gt;  
&lt;p&gt;The Poki can charge and recharge at &#128177; 2.1amps. This means you  
re not stuck for 20+ hours charging a 10,000mAh battery at 500mA. At 2.1 amp you  
should &#128177; be able to charge this in under five hours and with 90% conve  
rsion efficiency you should have around 9000mAh of &#128177; actual juice to sp  
are. That should be enough for at least three complete charges from dead to full  
for any &#128177; smartphone on the market today.&lt;/p&gt;  
&lt;p&gt;2.1 amp charging also means you re not going to spend ~7 hours charging  
a 3000mA phone &#128177; from dead, more like an hour and a half if your phone  
supports it.charging that fast.&lt;/p&gt;
